

Shirt Maths with Sammy

Can you work out the total number when you add up the squad numbers of our players?

$$\begin{matrix} \text{COMRIE} \\ 2 \end{matrix} + \begin{matrix} \text{ASHCROFT} \\ 6 \end{matrix} + \begin{matrix} \text{MARTIN} \\ 4 \end{matrix} =$$

$$\begin{matrix} \text{BEADLING} \\ 8 \end{matrix} + \begin{matrix} \text{THOMSON} \\ 7 \end{matrix} + \begin{matrix} \text{DOW} \\ 10 \end{matrix} =$$

$$\begin{matrix} \text{NISBET} \\ 15 \end{matrix} + \begin{matrix} \text{MCGILL} \\ 9 \end{matrix} + \begin{matrix} \text{PATON} \\ 21 \end{matrix} =$$

$$\begin{matrix} \text{THOMAS} \\ 23 \end{matrix} + \begin{matrix} \text{ROSS} \\ 13 \end{matrix} + \begin{matrix} \text{AFOLABI} \\ 10 \end{matrix} =$$

$$\begin{matrix} \text{TURNER} \\ 12 \end{matrix} + \begin{matrix} \text{EDWARDS} \\ 24 \end{matrix} + \begin{matrix} \text{DEVINE} \\ 14 \end{matrix} =$$

Shirt Maths with Sammy

Part two and the maths gets more complicated! Good Luck!

$$\begin{array}{c} \text{MCCANN} \\ 27 \end{array} + \begin{array}{c} \text{DOW} \\ 11 \end{array} - \begin{array}{c} \text{MCGILL} \\ 9 \end{array} =$$

$$\begin{array}{c} \text{THOMAS} \\ 23 \end{array} - \begin{array}{c} \text{TURNER} \\ 12 \end{array} + \begin{array}{c} \text{NISBET} \\ 15 \end{array} =$$

$$\begin{array}{c} \text{COMRIE} \\ 2 \end{array} + \begin{array}{c} \text{ASHCROFT} \\ 6 \end{array} \times \begin{array}{c} \text{AFOLABI} \\ 10 \end{array} =$$

$$\begin{array}{c} \text{MARTIN} \\ 4 \end{array} \times \begin{array}{c} \text{MURRAY} \\ 5 \end{array} + \begin{array}{c} \text{PATON} \\ 21 \end{array} =$$

$$\begin{array}{c} \text{TODD} \\ 26 \end{array} - \begin{array}{c} \text{EDWARDS} \\ 24 \end{array} \times \begin{array}{c} \text{THOMSON} \\ 7 \end{array} =$$
